

“ DG press Services *bv* is a company with the experience, know-how and the innovative drive of Drent Goebel specialists to be At Your Service ”

VPN remote service kit

DgpS can take care connecting your press to our helpdesk facilities by VPN connection.

The existing system on the Drent presses is equipped with an analogue dataline. Analogue datalines are not always stabile, are slow and are gradually taken out by the providers.

VPN remote will be achieved by creating a VPN (virtual private network connection) through the public internet between our central management server and a VPN firewall placed on the site of the customer.

The modification contains of the integration of an industrial VPN firewall kit with your press and internet. It is also possible to integrate this unit behind your corporate firewall.

- **No need of analogue line.**
- **Assures up to date future acces for remote diagnostic and support.**
- **A fast connection enabling fast troubleshooting.**
- **A safe connection**
- **Less downtime in case of press issues.**
