Moveable nozzles; modification for washing system

DgpS can take care of modifying your washing system with movable nozzles.

The existing system on the 520 Visions/ VSOP's is based on fixed located spraying Nozzles in their washing system. This implies a change that some area's on the rollers might not be washed.

The modification contains of a nozzle placed on a movable rail. The detergent will be sprayed over the whole roller width and so leaving no roller area unsprayed.

The modification consist of an update of software, hardware and pneumatics.

This results in less operator effort for claeing, shorter wash up times and less wear of blankets.

- **Shorter wash up times**
- **Less wear**
- **Less operator involmnet at wash up**
